Dr. K. C. Atwood  
Biology Division  
Oak Ridge National Laboratory  
Oak Ridge, Tenn.

Dear Kim--

November 29 (& 30, I assume) will be fine. I am tentatively scheduling your talk for 4:30 PM on Tuesday. Do you want to offer another title, or will "Biological mechanisms of radiation damage" cover it? This would be for a fairly general scientific audience. I am also hoping that you will give us a seminar, in the Genetics Department, on your heterokaryon studies--we can arrange that ad hoc.

Please let me know whether to rigidify these plans, and tell us when and where to expect your arrival. Needless to say, your accommodations are taken care of automatically.

Yours sincerely,

Joshua Lederberg
